

Resume placeholder

This is a placeholder file.

Replace this file with your real resume before sharing your portfolio:

1. Export your resume as a PDF.
2. Name it resume.pdf
3. Replace this file at assets/resume.pdf in the project folder.

No resume content has been invented here - the "Download Resume" button on the site is already wired up to this exact file path, so once you drop in your real PDF the button will work without any code changes.
